

GUMIIMPEX-GRP

Tehnologijom ZA okoliš i čovjeka!

Dobro opremljene proizvodne linije omogućuju brzu prilagodbu i realizaciju vrlo široke palete proizvoda, prema potrebi korisnika.

Izrada **velikih serija** moguća je na injekcijskim prešama velikog kapaciteta, sa silom zatvaranja 250 i 400 tona.

Izrada **proizvoda izuzetno velikih dimenzija** ostvaruje se na velikoj klasičnoj preši sa silom zatvaranja do 1200 tona. Kroz veći broj klasičnih preša, dimenzija od 400x400mm do najveće gabarita 1500x1800mm, **omogućuje se istovremena izrada više serija** gumenih proizvoda različitih oblika i primjene. Kalupi se izrađuju u **vlastitoj alatnici**, opremljenoj strojevima za obradu metala.

Vulkanizacija gume u velikom autoklavu promjera 3000mm i dužine 6000mm omogućuje vulkanizaciju proizvoda velikih gabarita, a tu je i manji autoklav promjera 1500mm i dužine 3000mm.

Suvremeno opremljen **laboratorij** s umjerenim instrumentima za ispitivanje fizikalnih karakteristika gumenih smjesa i gotovih proizvoda osigurava sljedivost i stalnu ujednačenu kvalitetu.

Well-equipped production lines allow rapid customization and implementation of a wide range of products to meet customer needs.

Production in **big series** is carried out on injection presses with big capacity, with closing force from 250 and 400 tons.

Production of **products of extremely large dimensions** is carried out on great classic press with a closing force up to 1200 tons, dimensions from 400x400 up to biggest dimensions 1500x1800 mm, which **allows the simultaneous production of multiple series** of rubber products of various forms and applications.

Moulds are made in our own tool room equipped with machinery for metalworking.

Rubber vulcanization in bigger autoclave with 3000 mm diameter and 6000 mm length, enables the vulcanization of products in large dimensions, and also there is a smaller autoclave too, with 1500 mm in diameter and length of 3000 mm.

The modern laboratory equipped with calibrated instruments for testing moderate physical characteristics of rubber compounds and finished rubber products, ensuring traceability and constant uniform quality.

Od 2004. godine sustav GUMIIMPEX-GRP je certificiran prema međunarodnim normama ISO 9001 i ISO 14001. Međunarodna norma ISO 9001 potiče prihvaćanje procesnoga pristupa u primjeni i poboljšavanju učinkovitosti sustava upravljanja kvalitetom te povećavanje zadovoljstva kupca zadovoljavanjem njegovih zahtjeva. Usklađena je s normom ISO 14001, a u GUMIIMPEX-GRP uvedena je kao integrirani sustav upravljanja kvalitetom i aspektima okoliša.

Since year 2004, GUMIIMPEX-GRP system is certificated according the international standards ISO 9001 and ISO 14001. International standard ISO 9001 proceed acceptance of procedural approach to the appliance and improving efficiency of quality management system, which also results with increasing of customer contentment by fullfiling customer demands. ISO 9001 is aligned with standard ISO 14001, and was imposed in GUMIIMPEX-GRP as integrated system of quality and environment management.

GUMENI PRSTENI ZA TRANSPORTNE ROLKE

GUMMI RINGE FÜR TRAGROLLEN

RUBBER RINGS FOR IDLERS

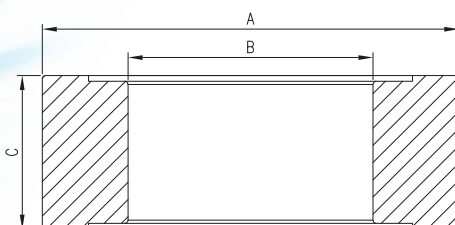

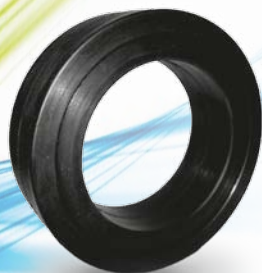

POTPORNI PRSTEN / STÜTZRING / SUPPORT RING - TYPE A

Tip - Typ - Type A

Naz. mjera/Nennmass	A	B	C
63,5 mm X 108 mm	104 mm	63,5 mm	25 mm
89 mm X 133 mm	130 mm	89 mm	30 mm

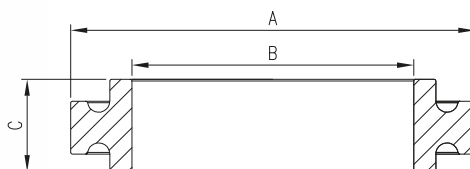

ZAVRŠNI PRSTEN / ENDRING / SUPPORT RING - TYPE B

Tip - Typ - Type B

Naz. mjera/Nennmass	A	B	C
63,5 mm X 108 mm	105 mm	57 mm	40 mm
89 mm X 133 mm	130 mm	84,5 mm	40 mm

AMORTIZACIJSKI PRSTEN / PUFFERING / BUFFER RING - TYPE C

Tip - Typ - Type C

Naz. mjera/Nennmass	A	B	C
63,5 mm X 108 mm	104 mm	87,5 mm	29 mm
89 mm X 133 mm	130 mm	84,5 mm	40 mm
63,5 mm X 89 mm	87 mm	58 mm	25,5 mm

Prsteni izrađeni od gume tvrdoće 70+-3 Sh-A.

Ostale dimenzije i oblici na upit.

Osim standardnih materijala izrađujemo i prstene specifičnih svojstava:

npr. u bijeloj boji za prehrambenu industriju, otporne na ulja i ekstremne temperature (od -40 °C do +190 °C)

Ringe sind aus Gummi 70+-3 Sh-A Härte hergestellt.

Andere Abmessungen und Formen per Nachfrage.

Neben dem bewährten Standard fertigen wir auch Ringe in Sonderqualität.

Z.B. weiss-Lebensmittelqualität, ölbeständig und für den extremen Temperaturbereich (von -40 °C bis +190 °C)

Rings are made from rubber 70+-3 Sh-A hardness.

Other dimension and shapes upon request.

In addition to the proven standard we produce rings in special quality,

such as white-FDA grade, oil resistant and for the extreme temperature range (from -40 °C to +190°C)
