ABOUT US

Gumiimpex is a company based on more than fifty years of experience and expertise in the rubber industry. We started as tire fitting workshop in Varaždin in 1970, and today we are the leading company in the region regarding the sales of tires, retreading of truck tires, recycling, and production of rubber-technical products.

We are present on European Union markets where 70% of our production is used in Germany, Austria, Ireland, Great Britain, Holland, Sweden, and Slovenia. In addition, we provide excellent service through our tire services. Our quality system management is designed, implemented, and maintained in accordance with principles and requirements of the ISO standard: ISO 9001, ISO 14001, and ISO 50001.

MISION & VISION

MISION

Our mission is to provide sustainable high-quality rubber-technical products and service. We are constantly investing in new technologies and knowledge, always with respect for the environment.

VISION

Our successful and innovative team is dedicated to modern entrepreneurship approach and expertise in the rubber industry. We develop, produce, and sell rubber-technical products and solutions that improve the user experience, increase safety and productivity of our partners.

OUR VALUES

Responsibility: In every situation, we take responsibility for work, colleagues, and ourselves. We build the company in a precise, reliable, and professional manner, respecting agreements with owners, associates, employees, and partners. We try to do our best and persistently build our business success, always with responsibility towards nature and wider society.

Development: We actively participate in the development of the company. We put quality and innovation in the first place through the development of people, processes, products, and markets. We are constantly improving through personal development, and we develop a passion for work.

Confidence: We have confidence in ourselves and our associates that everyone will do their part of the job properly. We believe in the good intentions of all participants, and we stick to the agreement. We stand by our words and appreciate honest feedback.

Loyalty: We feel belonging and believe in the company. Our loyalty to the company is evident through good times and bad ones. Through mutual respect and engaged work, we develop healthy, honest, and lasting relationships among colleagues and towards our clients.

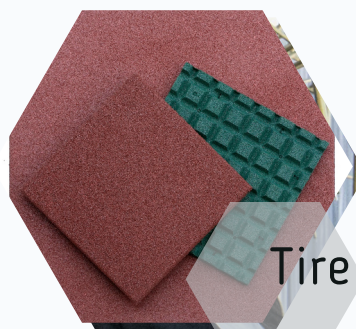

WHAT WE DO

Our activities include the sales of world's leading tire brands, the renewal of truck tires, production of rubber-technical products and recycling of all types of tires. We have acquired trust by over 10,000 customers. We are present on the markets of the European Union and even 70% of our production is sold in Germany, Austria, Ireland, Great Britain, the Netherlands, Sweden, and Slovenia. On top we provide excellent service through our tire services. Our quality management system is designed, implemented, and maintained in accordance with the principles and requirements of ISO standards: ISO9001, ISO14001 and ISO 50001.

Production of rubber technical products

Keeping pace with technology and in accordance with client needs, Gumiimpex-GRP today produces more than 7000 different rubbers technical products.

Tire recycling

The main goal of recycling is to reduce the harmful impact on the environment with reuse of valuable rubber materials. Annual capacity processing plant for recycling waste tires is 32,000 tons all kinds of used tires.

Distribution and sales of tires

Gumiimpex-GRP distributes and sales on the domestic market tires for cars, trucks, buses and large working machines of the world's most famous tire manufacturers Michelin, Goodyear, Continental, Bridgestone, Hankook, Pirelli and others...

Tire retread

Cooperation with leading material producers for tire retread, with a Michelin, Goodyear and Continental license provides the highest quality level of finished products. The production process as well as the end products are homologated according to the ECE R 109 standard (homologation), and fully meet the standards for traffic on all EU roads, providing complete safety of our retread.

TIRE RETREAD

Tire retreading is the process of replacing the worn tread of the tire with new one, reducing the amount of waste and consumed energy and CO2 emissions. Since retread is safe, cost effective and environmentally friendly practice, means 104 kg less material is used for two retreaded tires and produces 160 kg less waste. Same time it reduces CO2 emissions. In comparison of retreaded tires with a new one that is not retreaded, 70% of the material is saved due to life prolongation of the tire (source: Ernst ,Young, 2016). Retread saves 70% of natural resources such as water and oil in production the tires. At the same time amount of land is freed from rubber tree by 70%, thereby freeing area of arable land for food production.

Production capacity is up to 20,000 retreads / year of which 80% on client own casings.

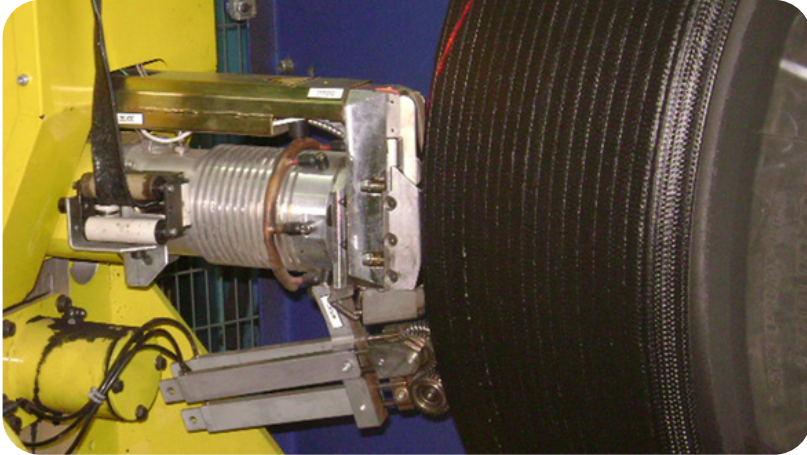

100% of casings is passing quality control with Sherography (laser interferometry and speckle patterns)

and electromagnetic induction systems, in addition of the visual control

On top we control the casing quality on the skiving.

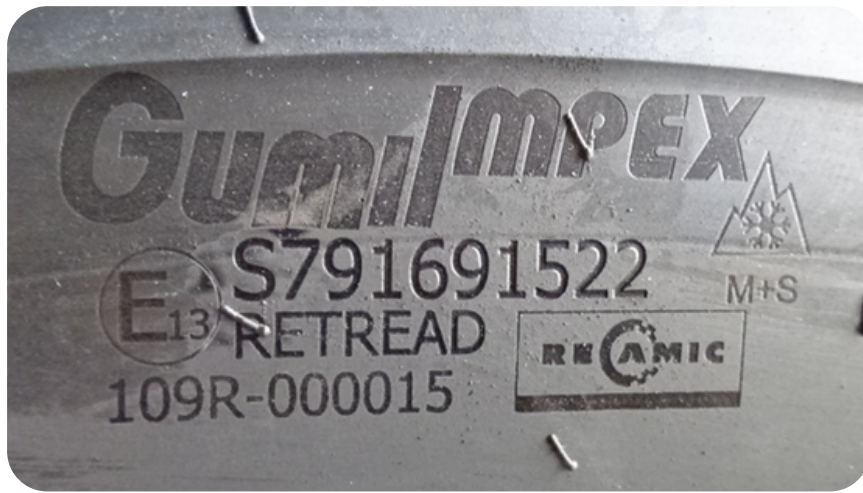

The cushion rubber is applied on the casing with special robotized machine.

We have also automatic tread layering system on Michelin licensed machine.

Unicircle layering of ring treads licensed by Goodyear.

Our retreaded tires are homologated according to the ECE R-109 Regulation in same manner as new tires.

Each single tire has follow-up and unique serial number from entrance to our workshop till the sales.

Production according to ISO9001/14001, and full implementation of Technical Manual from our licensor partners ensure quality premium product.

In addition to cooperation with manufacturers of new tires, we also produce with the leading independent retread material producers such as Vipal, Marangoni, Kraiburg.

We produce according to client needs.
